University of Economics in Katowice

NEW IDEAS, OLD TRADITIONS

The University of Economics in Katowice was founded in 1937 and is the biggest and oldest business school in the region, and one of the top universities in Poland. Each year, over 14,000 Polish and international students follow our degree programmes at Bachelor, Master, Doctoral and Post-graduate levels. The University's excellence is confirmed by full state accreditation in education as well as by top rankings of the faculties in the national assessment system of research institutions. According to the yearly Newsweek rankings related to graduates' careers, the University is one of the most successful Polish HEIs. Drawing on its long history and traditions, our university continues to grow and evolve, implementing new ideas and diversification in its study offer as well as participating in various research and teaching projects. Due to EU funded projects we are able to offer to our

students unique and innovative courses as well as internships in major enterprises in the region and abroad. Moreover, the University is expanding its infrastructure with modern facilities like the Centre for New Information Technologies and the Scientific Information Centre and Academic Library.

REGIONAL WITH INTERNATIONAL FOCUS

The heart of the University beats in Katowice, the capital of Silesia, the second-largest academic area in Poland. Here, centuries-old industrial traditions merge with a modern economy and dynamically developing culture; and we at the University of Economics in Katowice are a part of these changes every day. At the crossroads of major European transport routes, in the heartland of Central and Eastern Europe, we teach contemporary economics, finance, ICT, management, business and

public administration. Our students and graduates mature in a thriving metropolis and engage in the development of the region in the course of their professional lives: managing companies, organizing socio-economic life, taking part in a wide range of business activities. At the same time, our strategy implements internationalization as one of the most prioritized and dynamic activities of the University. Whether it is participating in international research and educational programmes, being involved in international student and academic staff exchange programmes like ERASMUS or CEEPUS. Entering into alliances with leading universities and major companies in the EU and beyond, or being members of international networks, the University of Economics in Katowice is becoming an internationally oriented centre of academic excellence.

■ **description**
The Master programme in International Business develops students' skills and knowledge and provides a stronger foundation for their future career in business and management. It offers a unique opportunity to continue business studies in the international context, with a solid grounding in economics, law, finance and management. Students work in a multicultural environment and carry out projects in cooperation with students from different countries, which is a key advantage for those planning a career in international business. The graduates will have developed their managerial competences, getting familiar with the strategic aspects of the functioning of international corporations and capital groups, and enhanced their skills in intercultural management. They should be prepared to manage a company or its specific operations conducted in an international environment. They may be employed in managerial positions in international corporations, e. g. as CEOs, CFOs, CMOs or Brand Managers, they can oversee PR & Communications or Human Resources.
